

Step-by-step procedure to execute the submitted solution:

- 1)Open the index.html file in frontend folder and execute it. If we execute the index.html file we will get the landing page of the website.
- 2) In landing page we will have the login button. When we click on the login button login form will open.
- 3)In login form we have to enter the student-ID and password . Student -ID must contain at least 10 characters (ex:22091A****) and password must have one capital letter , one special symbol and having the length at least 8(@B675vfdu).
- 4)If we enter the correct details then we get the course-selection-system main page . In that we have to select 4 theory courses along with the professors and 2 lab courses.
- 5)After selecting the courses we have to submit the feedback if we want.
